

A Finmeccanica Company

03 November 2010

Federal Communications Commission
Equipment Authorization Branch
7435 Oakland Mills Road
Columbia, MD 21046

SUBJECT: FCC ID: UGL622ANH

REFERENCE: Project #CB-10-0093

To Whom It May Concern:

The release BIOS of the ARMOR X7 will not allow simultaneous operation of the WLAN (FCC ID: UGL622ANH) and WWAN (UGLGOBI2) modules. The lab performing the SAR testing, Sporton International, did an evaluation to determine that simultaneous transmission SAR measurements would not be required if collocation and simultaneous operation were desired. We understand that a Class II Permissive Change would be required prior to implementing this feature if it is desired in the future.

Sincerely,

Albert Fernandez
Senior Test Engineer
