Power Output listed is maximum aggregate Conducted power. Modular approval. This module is approved for use in RF category Mobile configurations. This module must be installed by the OEM or OEM integrator. Instructions for installation of this module must not be given to the end user. Only those antennas tested with the device or similar type antennas with same or lesser gain may be used with this transmitter. The antenna used for this transmitter must be installed to provide a separation distance of 20cm from all persons and must not be co-located with any other antenna or transmitter. This device is restricted to indoor only operations within the 5150-5250 MHz band. End users must be provided with operating and installation instructions to ensure RF exposure compliance. Device is a client-only device operating in a 3x3 MIMO configuration, enabled for either 2.4 or 5GHz band operations as described in this filing. Both transmitters may operate simultaneously with respect to 1.1307 and 2.1091.

This device complies with the Dynamic Frequency Selection (DFS) requirements of FCC 03-287 as a Client-only without Radar Detection.

CC: This device is certified pursuant to two different Part 15 rules sections.

MO: This Multiple Input Multiple Output (MIMO) device was evaluated for multiple transmitted signals as indicated in the filing.
